ABOUT

House of Pemberley is an emerging interior design studio founded by creative director Nupur Tandon in 2019, registered under the trading name 'Pemberley Design Ltd'

"We offer comprehensive interior design services across private residential and development projects, with a portfolio that spans both new builds and renovations.

At House of Pemberley, our ethos is rooted in a holistic approach to design. We take the time to deeply understand our clients' perspectives, crafting comfortable and approachable spaces through a thoughtful and collaborative process. We work closely with a network of trusted partners, including architects, builders, craftspeople, artists, and suppliers, to create a balanced, harmonious interior that blends thoughtfully sourced antiques with statement contemporary pieces.

Nupur brings unparalleled expertise shaped by her experience with leading design studios in London, where she contributed to projects valued at up to £250 million.

She draws from a rich legacy - two generations of furniture manufacturing with a focus on classic craftsmanship, which instilled in her a deep appreciation for artisanal techniques and timeless design. From her formative years, Nupur was steeped in an environment where she fostered relationships with carpenters, weavers mastering intricate chair caning, and artisans adept in the handmade nuances of furniture-making.

This early immersion laid the foundation for her profound understanding of design, art

movements, and global designers, augmented by her academic pursuits - a Master's degree from an Italian institute, further refining her design sensibilities. Nupur's relentless pursuit of innovation, epitomising luxury design through meticulous attention to refined materials and exquisite craftsmanship, creates each house as a work of art and living."
